

# 18 Restaurant Menu Templates

## Instructions

Creating a great restaurant menu from scratch can be a lot of work, which is why we've done the heavy lifting for you by putting together 18 free restaurant menu templates. Each of these restaurant menu templates is fully customizable, which means you can add your own menu items, images, logo, and more.

**Here's how to customize your new restaurant menu templates:**

1. Download Adobe Reader (also known as Acrobat Reader) for free from <https://get.adobe.com/reader/>.
2. Open the specific menu template you wish to edit.
3. Click on any text you wish to edit and replace it with your own text. If you do not require a specific text field, simply highlight the section and delete the text within.
4. To replace an image, simply click the image and you'll be promoted to swap out the image with something else on your computer. For instance, you may wish to swap out an image with your own logo file.
5. After you've fully customized your menu, hit "Save" in Adobe Reader.
6. Your menus are then ready to print and use in your restaurant. Just note that these menu templates should not be used as downloadable PDFs on your restaurant website because the text and images fields will remain live and editable. If you do wish to use the menu template on your website, you will need to convert the PDF into a JPEG – something that can be done easily with many free online services.

Feel free to change each template as much or as little as you like – these menus are meant to be messed with!
